- Strategic Advisor
- #25 on the list of 100 Most Influential Individuals in Blockchain  
<https://richtopia.com/inspirational-people/blockchain-top-100>
- Author of best-selling “Profitable Social Media: Business Results Without Playing Games”
- Aside from being a prominent social media figure, Warren has worked in technology, business services and broadcasting, and is currently involved with media, health, and several startups

# The ICO

## **The Whitepaper**

- Very descriptive and detail oriented: compels investors to take action.
- 100% original/no plagiarism found.
- Development begins Q2 of 2018
- Beta testing to begin Q4 of 2018

## **The Product**

- PodOne is a blockchain-based, decentralized contact center networker that connects businesses and agents together.
- Idle time costs U.S. employers over \$100 billion a year. PodOne addresses this issue by monetizing staff downtime, providing a new standard for call center training, and utilizing secure blockchain technology.
- PodOne automatically incentivizes customer support agents to deliver great service utilizing their signature QBE Ratings Engine
- The demand for call centers is increasing and PodOne poses to fill this gap in the market as well as solving the various issues the industry faces with talent acquisition and employee down-time.
- With PodOne, an employer can auction its employees' idle time to other businesses who require additional human resources to complete tasks.
- PodOne provides an E-Learning platform that consists of various courses that can be created by the business owners and members of the PodOne network. This E-Learning platform ensures that their picks for customer support agents possess the specific skills and knowledge necessary to deliver a quality experience for their customers.

## **The Facts**

PodOne is a solution for contact centers that poses to eliminate the costs of idle employees and recruiting talent by offering a decentralized blockchain platform for businesses and agents. CEO Marlon Williams is not only extremely familiar with the call center industry, he is the founder a successful call center software company. The team is well-versed in blockchain technology and many disciplines of software engineering. Being one of the top 25 most influential blockchain personas in the world, Warren Whitlock is an exceptional asset to PodOne. His knowledge and advisement will allow Pod One to excel and aid in its disruption of the contact center industry.

## Conclusion

PodOne has received a **Crypto Connection Trust Score of 5**. This is the highest ranking an ICO can receive and is only given to a few exceptional projects. The team is transparent and public facing. The team behind PodOne has a combined 50 years of experience in the contact center industry and are the masterminds behind Fenero, a disruptive and award-winning cloud based contact center platform used by over 2,200 call center and customer service organizations across the globe. The whitepaper is original, clear, informative, well-researched, and captivating. The business model is extraordinary. PodOne's technology poses to displace the customer service and call center industry by utilizing its technology to increase productivity, save employers money, and reward customer support representatives for providing excellent service.

The verdict: PodOne is a shining example of a trustworthy ICO. The revolutionary technology PodOne has to offer is set to completely change the way the call center and customer support industries think about human resources. With that being said, the ROI on their Qubicle (QBE) token is expected to be substantial.

As always, do your own due diligence!
